- Bachelor of Technology (BoT) in Information Technology. GPA: 4.19
- Deans Honour Roll
- Relevant Coursework: Programming I & II, System Analysis and Design, Web development, Operating Systems, Server Operating Systems, DBMS, Data Structures, Networking Technologies I & II

TECHNICAL EXPERIENCE

Projects

Spotify Clone (June 2023)
- Developed a Spotify clone using a range of dependencies to create a functional and visually appealing music streaming platform.
- Utilized technologies such as React, TypeScript, and Tailwind CSS to build a responsive and user-friendly interface.
- Integrated Supabase for user authentication and data storage, ensuring a secure and personalized experience.

Personal Portfolio (May 2023)
- Developed and designed a dynamic web development portfolio showcasing my skills and projects.
- Utilized React, Tailwind, and Framer Motion to create an interactive and visually appealing website.
- Included a comprehensive overview of my projects, highlighting key features and technologies used.

FIFA World Cup Simulation (April 2023)
- Developed a FIFA World Cup simulation using C++.
- Leveraged real data from teams to create a realistic simulation of football matches.
- Implemented FIFA World Cup rules and regulations into the simulation, including penalty kicks tiebreakers, and third place.

Game Store (February 2023)
- Developed an e-commerce website using React and Typescript on the frontend, and Node and Express on the backend, resulting in a fast and responsive user experience.
- Integrated Stripe payments to enable a seamless checkout process.
